

THE DIGITAL LOCK WITH A REAL TIME CLOCK

The Horizon digital lock by Lowe & Fletcher is now available with an accurate real time clock. The Real Time Clock feature means the lock can be made operational only within specified hours or it can be rented for set periods of time. Time and date can be set and read from the keypad and codes can be generated on the website.

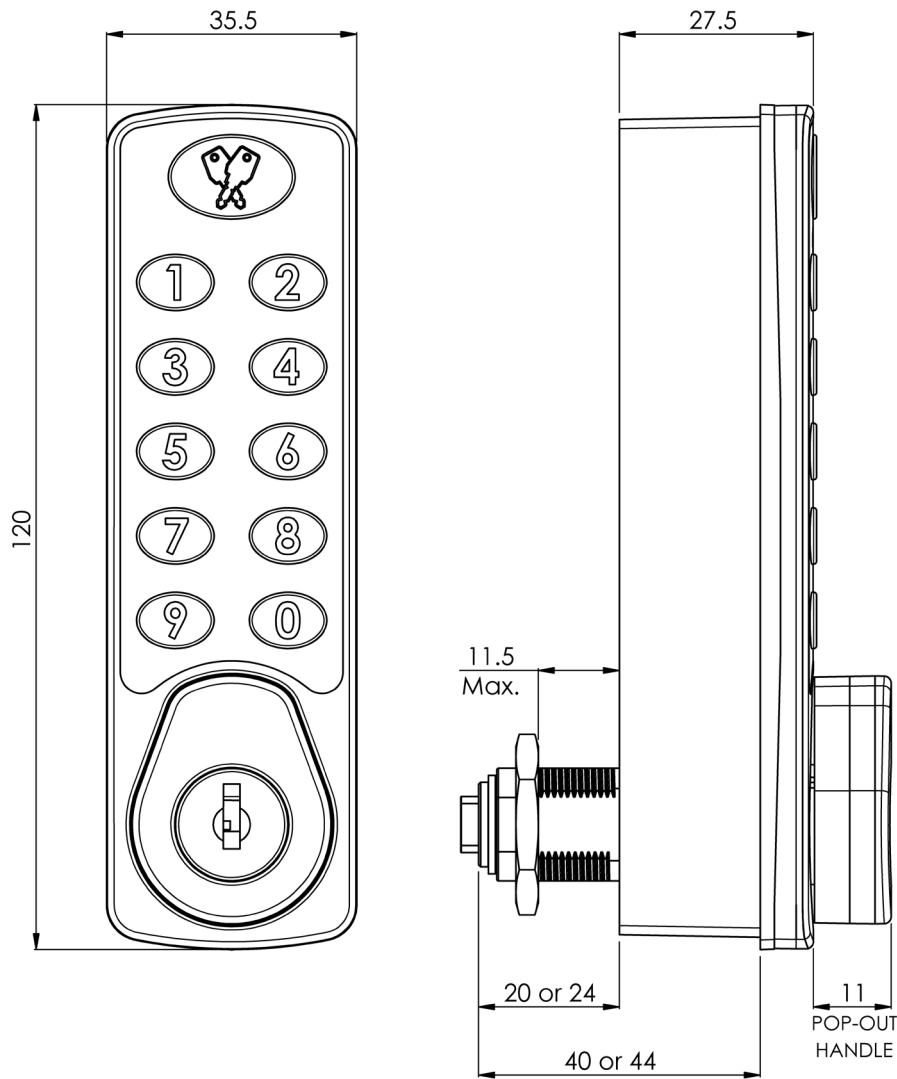

Designed for use on lockers and personal storage applications in any environment, this innovative feature can help alleviate the issues caused by users who leave their personal belongings in a locker even when not on site. The locks can be set to open at a chosen time, left belongings can be removed leaving 100% of the lockers in use 100% of the time. It also means lockers can be rented for set periods of time using a unique access code generated on the lock management website.

The multi user mode enables the lock to be pre-programmed with up to 50 users at one time for areas where lockers are used by the same customers or staff on a regular basis. The unique mechanical override key permits managerial access in the event of an emergency and an impressive range of custom colours will complement any environment.

CONVENIENT AND VERSATILE SYSTEM
NO MORE LOST KEYS

Horizon
digital lock
