

BUYING GUIDE: SCHOOL LOCKERS

This Buying Guide has been designed to assist with your locker purchasing decision. Davell have been providing lockers to schools, Australia wide, for over 50 years.

All of our lockers are available in a wide range of configurations with many colour and locking options. Listed below are a few things you might want to consider when buying new lockers for your school.

Size

What is to be stored in your locker? How many doors high do you require?

Locker manufacturers offer a range of tiers, with each tier representing a door.

Standard options include one to ten tiers, with widths of 305mm, 381mm, 450mm, and 495mm, and depths of 450mm or 550mm.

For example, a popular school locker features four tiers, measures 381mm wide, 1803mm high, and 450mm deep, accommodating a student's backpack and personal items.

Custom sizes are available upon request.

Location

At Davell, we make lockers for various environments. Indoor lockers are made from mild steel, while those under awnings or semi exposed to the elements are made from zinc coated steel for better corrosion resistance.

Note - We do not recommend placing lockers where they may be exposed to inclement weather, as it is impossible to avoid water ingress into the interior of the locker and the locking mechanism.

Lock Type

When choosing a locker, consider the locking system. Standard options include key operated locks or padlock compatible handles.

For higher security, choose a key operated lock with an interchangeable barrel.

We also offer mechanical or electronic combination locks, with override keys for forgotten codes, as well as combination padlocks for our 'provision for padlock' lock option.

The latest technology features Remote Allocation System (RAS) locks for remote code management and enhanced customisation.

Style

Traditional Lockers have classic retro ventilation louvres at the top and bottom of each door, while Contemporary Lockers feature a modern flush slotted pattern running the full length of each door.

We can also create lockers with no door ventilation if needed.

Durability & Security

Davell lockers are crafted from heavy gauge steel with a fully welded frame for added strength and stability.

Each door has full length reinforcement and a perimeter frame around the door to prevent the door from being forced inwards.

Optional three point locking mechanism is available for enhanced security.

Sloping Tops

A good option for schools is to equip lockers with sloping tops. This design prevents clutter like bags, shoes, and food scraps from accumulating on top, resulting in a cleaner, more attractive appearance.

Colours

Forget choosing between grey or beige. Davell lockers come in over 50 Dulux thermoset powder coat colours, allowing you to match your school or house colours.

You can select contrasting colours for doors and bodies or mix colours. Options include standard, pearl, ripple, or textured finishes, with custom colour matching available.

Mobile Phone Lockers

Our Mobile Phone Lockers securely store phones and meet the increased demand from recent legislation banning phone use in schools.

We offer single towers with 6, 8, 10, 12, or 15 compartments (200mm wide) and single door cabinets for 32 or 48 phones.

Locking options include Key Operated, Padlock Provision, Mechanical Combination, Electronic Digital or RFID Locks.

Plinths, Stands, Stands With Seats, Bench Seating

You can also add locker plinths, stands, and bench seating to complement our locker range.

A plinth raises the locker for easier access to the bottom compartment, while a stand offers the same benefit along with better ventilation and easier cleaning underneath.

Ideal for storing small items, these wall-mounted units offer various designs to secure your valuables.

Unlike Mobile Phone Lockers, they come in 4 door high configurations with 4, 8, 12, 16, 20, or 24 compartments.

Locking options include Key Operated, Padlock Provision, Mechanical Combination, Electronic Digital or RFID Locks.

Laptop Charging Lockers

Charge laptops, iPads, tablets, E-Readers, and other devices with Davell's Laptop & Device Charging Lockers.

Available in 10 compartment models with no door, single lock, or multiple locks.

Choose from three charging options: Single GPO, USB Type-A and USB Type-C, or Single GPO with USB Type-A and USB Type-C.

Mobile Phone Charging Hub

Davell's new Mobile Phone Charging Hub features 18 lockable compartments, each with an OE Elsafe TUF USB A+C 30W fast charging module.

It includes:

- Concealed hinging system
- Rear exit 2 metre power lead with thermal overload switch
- Ventilation slots inside and out
- Freestanding and fully assembled
- Connectable hubs
- Multiple colors and locking options

Tablet & iPad Charging Lockers

Charge and store your tablets or iPads securely in a locker.

Each compartment includes a Baseus 4-in-1 braided cable compatible with USB Type-C (x2), Apple Lightning, and Micro USB devices.

- Able to charge multiple devices in the same compartment simultaneously
- Includes a single two metre 240 volt 10 amp power lead with thermal overload switch
- Concealed hinging system
- Electrical components comply with relevant Australian standards
- Freestanding or wall mounted using keyhole cut outs in pack panel
- Available in various colours and locking options
